The Entrhal Sealers:  
safe, compact, and easy to operate!

# Compact, Lightweight, Safe, and Easy to Operate SEALER for Instrument Pouches

BES has introduced a new sealer to seal instrument pouches before sterilisation. The most compact sealer in the marketplace, using up to **50% less space** than any other sealer currently available.

It is **lightweight** and **easy to operate** with simple to understand instructions. It has a **large display** with self-explanatory messages to guide you through the process. The sealer can be tilted at an angle for **convenient handling** of instruments. This sealer conforms to European and International Safety Guidelines and Standards, including **EN 868-5** and **ISO 11607-2**

## Benefits of Entrhal Sealers

- Lightweight (under 10kg)
- Easy to lift to clean under
- Compact, space saving
- No need for roller table
- Angled for easy applications of pouch
- Meet **EN 868-5** and **ISO 11607-2** test standards
- Complete roller circuit for test cycle
- Built in printer unit
- Fast heat up time means faster use
- Standby facility gives
  - longer life
  - energy savings
- Reverse function if pouch gets stuck
- Clear multifunctional touch screen

**Orange 'easy' sealer  
brightens workspace!**

## Technical Data

### EM20

- Size: 380mm x 100mm x 240mm (w x h x d)
- Ideal for small clinics, dental surgeries, etc
- Without built-in printer
- 4" LED display

### EM20KLC

- Size: 380mm x 100mm x 240mm (w x h x d)
- Ideal for smaller clinics and dental surgeries
- Built-in printer and USB computer connection
- Keyboard, language and password settings available
- Storage of parameters with logger
- Service interval indicator
- Label printer connection port
- Auto start, off and standby function
- 3.9" graphical display

### EM30KLC

- Size: 465mm x 100mm x 240mm (w x h x d)
- Ideal for busier centres
- Built-in printer and USB computer port
- Keyboard, language and password settings available
- 2500 text entries can be stored
- Storage of parameters with logger
- Service interval indicator
- Label printer connection port
- Seal check print out function for record keeping
- Auto start, off and standby function
- 5.7" graphical display
- Print fabrication and expiry dates, batch numbers, and personnel codes for track and trace needs
