

# Removing the Need to Assume

- ✔ Improve Patient Safety
- ✔ Make Cost Savings
- ✔ Avoid Cancelled Operations

## MedZense LG20-e – Rigid Scope & Light Cable Tester

MedZense LG20-e allows hospitals to assess efficiently the light transmission quality of both rigid scopes and light cables.

The MedZense is portable, lightweight and has a small footprint, with a sleek colour touchscreen displaying easy-to-read data.

MedZense is compatible with all major brands of light guide cables and a wide range of rigid scopes. It is also the only device of its kind capable of testing Endoeye scopes.

**No other unit tests the cable quality across the full visible light spectrum.**

### Benefits of Using MedZense LG20-e:

-  Ensure good visibility, avoiding delays in procedures caused by bad lighting
-  Save costs on unnecessary repairs and replacements
-  Ensure equipment is fit for purpose before surgery, avoiding cancelled operations
-  Make testing easy with plug and play technology and touchscreen interface
-  Alleviate staff stress and patient distress by avoiding delays
